Recommendation for Ese Kelvin Uvbiekpahor

Dear University of Manitoba Admission Committee,

It is my pleasure to recommend Ese Kelvin Uvbiekpahor for his MSc. Computer Science at your University.

I have known Ese for over 3 years and during the years of our acquaintance, He worked alongside other team members on most of our in-house software development at Dangote Oil Refinery under my supervision.

Ese has also been involved with variety of tasks which includes software development for mobile and web applications, software integration to other external companies providing payment solutions to the Refinery projects and also integration to SAP for processing H.R leave request submitted via our Daily Attendance Web application.

Ese is an intelligent and responsible young man. His skills in programming and database design are top notch and I know he will be an excellent addition to your MSc programme in winter 2022.

Sincerely,

Opeyemi Ibiwoye
